

The Rhinowares hand coffee grinder offers a perfect solution for grinding coffee while traveling, while at work, or just at home.

Features:

- Quality stainless steel housing for effective cleaning and reduced static. Conical ceramic burrs:
 - stay sharper longer
 - don't rust
 - clean completely & easily
- Simple adjustment for a wide range of grind types
- Fits approximately 42 grams of coffee beans - the ideal size for most brewing
- Convenient carry bag
- Easy-turn grind motion

*How-to use video demonstration coming soon!

Remove the Rhinowares hand grinder from the box.

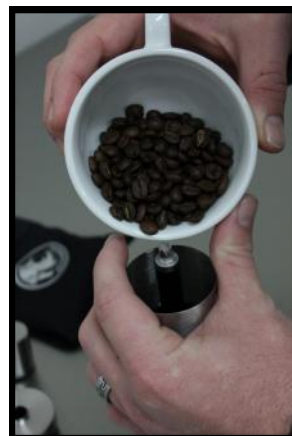

The protective carry bag holds the grinder and handle.

Measure the desired amount of beans for grinding. The grinder holds 42 grams comfortably.

Simply lift and remove top to fill with desired amount of coffee beans.

Fill the grinder top.

Replace the grinder top, making sure it fits snugly.

Remove top part of grinder to empty grounds.

Fit grinder handle to the top and proceed to grind, turning the handle clockwise.

To adjust the grind, simply twist the grinder mechanism - clockwise for finer, counter clockwise for coarser.

To clean the ceramic grinder burrs, unscrew the white rotary piece and pull the entire internal burr piece straight out, then gently slide the external burr piece out.

Be extremely careful not to drop the ceramic burrs as they are highly breakable.

To clean, simply wash with warm soapy water & rinse thoroughly (a toothbrush may be used to remove oil from crevices). Reverse order to reassemble.
